People that stupid

1. Deserve to be charged extra by their ISP so they can hire support people to answer the stupid questions to get to the people with real problems like NAT static connection errors and such
2. Humiliated forever and should not be allowed on the internet. IQ tests should be required... heck make it a Widget in Opera, FF and IE before you can browse.

[Michael](#) 01 September 2006 - 08:12 PM

NAT errors aren't the ISP's problem.

[cooldude7273](#) 01 September 2006 - 08:20 PM

I'm getting RC1 off connect at 160KBps - which is just under my 1.5mbps limit, because 1.5 mbps is 187 kbps.

he wasn't going to accept its megabits not megabytes was he 😊

[KSoD](#) 01 September 2006 - 08:53 PM

Gee i cant imagine who that is. 😬 I had my own discussion with him today as well. About the difference between Build 5536 and Build 5552. Trying to tell me that wetlegs said there was a differece. He specifically told him. 😊 When i brought up the topic where i asked wetlegs the difference and directed him to it. He didnt say nothing. 😞

I had this talk with him before. I remember tlling him all this. He also didnt believe me that when he first started to download 5552 that if there are no seeders you cant get the whole file. 😊 My what a Seinfeld character. KRAMER! 🙄

I HAD THAT SAME THING WITH HIM ABOUT AN HOUR AGO LOL

Ive also had him telling me he doesn't think windows has a kernel, asking where he can get nero - and after i point him to nero.com (duh), he says "No i need the full version not the trial".

Let me say im glad I turned chat logging back on. Expect more of this LOL

Lol he asked me the same thing 😄 He was asking about RC1 and he was like "are all the bugs fixed?" to whit I replied "I didn't really see any in 5536.."

"I cant install nvidia drivers on it.."

"You mean the beta 2 nvidia drivers that are older than the version 5536 includes? Ahh yes"

"But i need to install them to play games"

"Noo...I played F.E.A.R and ran 3DMark on it with no problem using standard drivers"

KSoD 02 September 2006 - 08:41 PM

I told him he didnt have to install the Drivers. He still insisted that he had to. I was just laughing my arse off. Then he was saying how he took ALL DAY to download 5552. Then i tell him 5600 leaked. He gets that torrent and says how it is slow and it will take him a couple of days to get. When i say i got it in less than 4 hours he couldnt believe it. So i took a screeny of uTorrent with the time of completion. He was shocked that i got such good speeds.

The he went into the rant about how he has a 10mb line. I just signed off after that. I didnt even want to get into that conve again 😊😊

Come on. Have you been to his site and actually looked around? Some of the stuff said is off the wall. Mainly it is about warez. I just had to laugh when i stated that it took him 1 day to get 5552 and now he had to waste another day downloading 5600. 😊 Just so he can find out that some things still dont work well. 😊
